Project Name	Smart Fashion Recommender Application
Team Members:	S.SUWETHA CATHERINE SHIRLEY GERALD A.MARIA MAXSON B.ADESH BARADWAJ

### Step 1:

Go the official Docker website: <https://docs.docker.com/desktop/install/windows-install>

The screenshot shows the Docker Docs website for installing Docker Desktop on Windows. The page has a dark theme. At the top, there's a navigation bar with 'docker docs' and a search bar. Below it, a breadcrumb trail reads 'Manuals / Docker Desktop / Install Docker Desktop / Install on Windows'. The main content area is titled 'Install Docker Desktop on Windows' with an estimated reading time of 7 minutes. It includes a 'Docker Desktop terms' section stating that commercial use requires a paid subscription. Below that is a 'Download Docker Desktop for Windows' section with a prominent blue button labeled 'Docker Desktop for Windows'. A sidebar on the left lists various documentation topics, with 'Install on Windows' currently selected. On the right, a 'Contents' table of contents lists links for system requirements, installation methods, and other related topics.

## Step 2:

Click that button (Docker Desktop for Windows) and download will start and it takes few minutes to complete.

## Step 3:

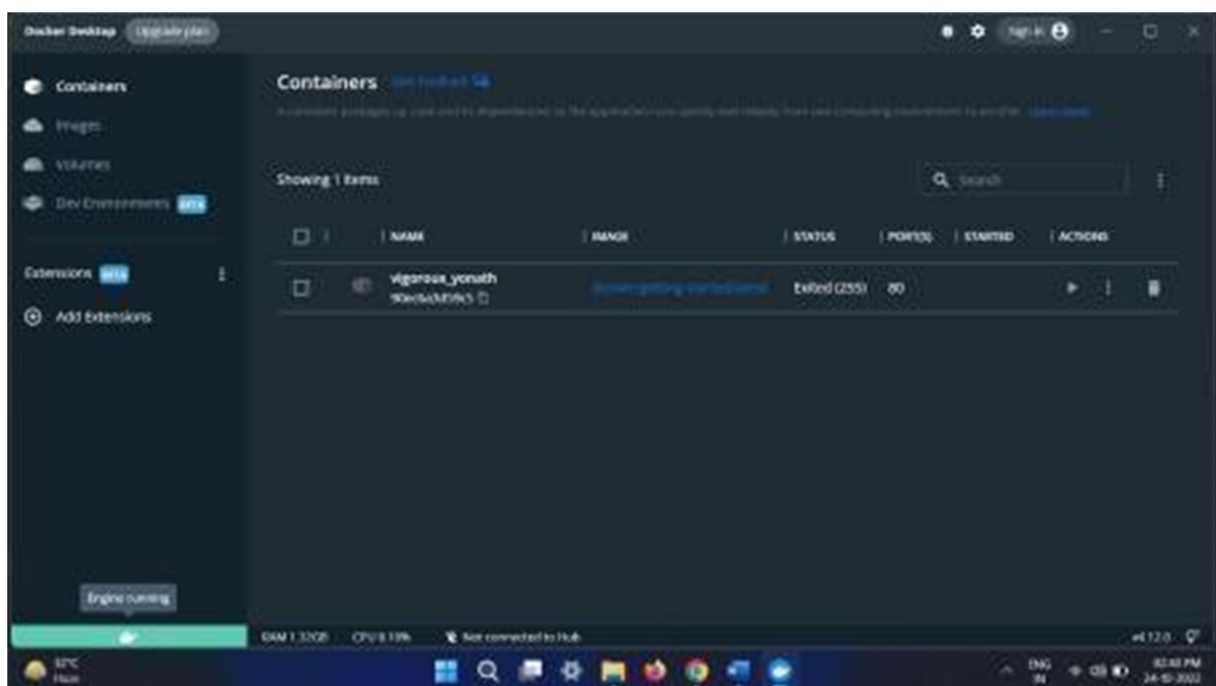

Go to downloads in browser (or) type **ctrl + J**, it will navigate to download page and double-click the particular docker file.

## Step 4:

Now Installation is complete. This icon was added in your desktop. Double-click the icon to start the docker app, you can register and login that app to access those credentials.

## Step 5:

Docker will start correctly, the left bottom side was shown in green color, docker will show the status of docker app working successfully.

## Step 6:

Finally, the docker is installed successfully.
